Bank Name: State Bank of India (SBI)

Bank A/C No.: [REDACTED]

IFSC: [REDACTED]

Branch: [REDACTED]

PROJECT REQUIREMENT

1. Core Modules

CRM & Lead Management; WhatsApp Business API & Automation; Product & Catalogue Management; Smart / Customer-Specific Catalogue; Quotation & Proforma Invoice; Sales Order & GST Billing; Payment & Outstanding; Inventory & Purchase; Production & Dispatch; Digital Marketing; AI Assistant & Analytics; Reports, Notifications, Security & API integrations.

2. User Roles

Admin, Sales Team, Accounts, Production, Purchase and Marketing with configurable role-based permissions.

3. Lead Management

Capture Website, WhatsApp, Google Business Profile, Google Ads, Facebook, Instagram, IndiaMART, Justdial, TradeIndia, Alibaba, Email, Phone, Referral and Manual leads. Fields: company, contact, mobile, WhatsApp, email, city/state, industry, requirement, product, quantity, budget, delivery date, source, salesperson, status, priority, notes and follow-up. Pipeline: New → Contacted → Requirement → Catalogue → Quotation → Negotiation → Sample → Order → Production → Dispatch → Completed.

4. WhatsApp Automation

Official WhatsApp Business API. Incoming chats, lead creation, welcome message, relevant catalogue, quotation, invoice, payment reminder, order and dispatch updates. Automation should stop when customer replies/order is confirmed where appropriate.

5. AI WhatsApp Assistant

Answer approved questions about price, MOQ, catalogue, fabric, sizes, delivery and customization. Use approved company data; transfer complex enquiries to human salesperson.

6. Catalogue Automation

Product master with images, SKU, category, fabric, colour, sizes, MOQ, prices and customization. Requirement-based catalogue selection, PDF/digital catalogue, shareable link and analytics for opens, product views and enquiry clicks.

7. Quotation, Order & Billing

Quotation with products, quantity, rate, discount, GST, terms and validity. Status tracking. One-click Quotation → Proforma Invoice → Sales Order → Production. GST invoice with GSTIN, HSN/SAC, CGST, SGST, IGST,

discount, shipping and round-off. Include Bank Details above on invoice templates.

8. Payment Management

Customer ledger, invoice total, paid, pending, overdue and due date. Automatic reminders and receivable dashboard.

9. Inventory, Purchase & Production

Stock In/Out/Reserved/Available/Low Stock. Production: Order Confirmed → Material → Cutting → Stitching → Finishing → QC → Packing → Dispatch. Purchase: Request → PO → Material Received → Stock → Supplier Bill → Payment.

10. Digital Marketing

Google Ads, Meta Ads, Facebook, Instagram, Google Business Profile, Email and WhatsApp campaigns where APIs/permissions allow. Track leads, quotations, orders, revenue, conversion, CPL, customer cost and ROI.

11. Follow-up & Workflow Automation

No-code workflow builder. Example: Hotel lead + quantity >50 → assign salesperson → send catalogue → follow-up → notification → HOT. Quotation sent → wait 24 hours → follow-up if no reply; stop if customer replies.

12. Dashboard & AI Analytics

Today's leads, follow-ups, quotations, orders, sales, outstanding, production and dispatch. Salesperson performance, lead-source performance and AI answers for sales trends, best products, profitable sources and follow-ups.

13. Website & API

Website enquiry/product enquiry/WhatsApp clicks connected to CRM. API-first architecture for WhatsApp, website, Google, Meta, payment gateway, shipping, email, AI and future accounting integrations.

14. Security & Data Ownership

Role-based access, authentication, optional 2FA, encryption, automatic backup, audit log and activity history. Amit Uniform owns its business data as agreed in contract, with complete export facility.

15. Reports

Lead, Sales, Customer, Product, Quotation, Invoice, Payment, Outstanding, Purchase, Inventory, Production, Dispatch and Marketing reports. Export Excel/CSV/PDF.

16. Development Phases

Phase 1: CRM + Leads + Customer + WhatsApp + Catalogue. Phase 2: Quotation + Sales Order + Billing + Payment + Inventory. Phase 3: Production + Purchase + Dispatch. Phase 4: Digital Marketing + ROI. Phase 5: AI + Advanced Automation.

17. Developer Deliverables

UI/UX prototype, architecture, development, testing, deployment, SSL, backup, documentation, training, source code, database, API documentation, logins, maintenance terms, bug-fix period and data export.

18. Final Workflow

LEAD → WHATSAPP → CATALOGUE → FOLLOW-UP → QUOTATION → NEGOTIATION → ORDER → PRODUCTION → BILLING → PAYMENT → DISPATCH → CUSTOMER → REPEAT ORDER.

Developer Note: Coding start karne se pehle UI/UX prototype, technical architecture, detailed quotation, timeline, integration/API charges, hosting and AMC terms written approval ke saath finalize karein.
